

SFMCA Development Awards

Development opportunities for Full and Provisional Members.

The SFMCA Development Award is held every two years in conjunction with the Australasian Milling Conference.

There is opportunity for five State Development Award winners with one from each State Branch (New South Wales, Queensland, South Australia, Victoria/Tasmania, and Western Australia). Applicants must be actively employed by a stock feed milling company, which is either a Full or Provisional Member of the SFMCA. Applications are open to employees working in any area of the feed industry including production, technical services, sales, administration and purchasing. Members will be advised when applications are open.

The winners will receive:

- Industry recognition through presentation of their award at the Australasian Milling Conference.
- Travel, accommodation and registration to attend the Australasian Milling Conference.
- Study Tour of the stockfeed industry led by SFMCA Development Officers.
- Opportunity to gain knowledge and experience from interacting with other State Development Award winners.

The Study Tour will include guided visits as a group to a number of feed mills, premix plants, raw material suppliers, grain handling facilities, livestock producers and end user processors.

This is a once only opportunity to visit feed mills you would never have the opportunity to visit. SFMCA members are encouraged to pass this opportunity to potential applicants. By having five state winners, we have the capacity to provide this development opportunity to more people. SFMCA looks at this award as providing development to the individual winners for their own benefit as well as that of their employer and the wider industry. Many previous winners have moved into more senior industry roles as well as actively working with SFMCA on our Federal Council and State Branch Executive Committees.
